

ANUARIO DE ESTUDIOS MEDIEVALES

A new annual review of general medieval interest, covering the political, economic, religious, social, literary, artistic, scientific and other aspects of medieval European life, although with a certain predominance of Spanish themes. Outstanding scholars from many countries are writing for it, particularly those with a special interest in medieval Spain. Lengthy studies, short articles, surveys of the present state of research, reviews of books and general information about recent developments in all branches of medieval studies will all be printed in any of the Romance Languages. Summaries of the articles will also be given in French and English. The *Anuario* will take note of all books received, and will publish reviews of all books of which it receives two copies.
